Mental Health Overview

What Is Mental Health?

“A state of well-being in which a person realizes his or her own abilities, can cope with the normal stresses of life, can work productively and fruitfully, and is able to make a contribution to his or her community.”

– World Health Organization

What Are Mental Health Disorders?

“Health conditions that are characterized by alterations in thinking, mood, or behavior (or some combination of those) associated with distress and/or impaired functioning.”

– U.S. Department of Health and Human Services
